## ALPHA CORPORATION WINS MARYLAND STATE HIGHWAY ADMINISTRATION CONTRACT

**BALTIMORE, MD, March 12, 2015:** Alpha Corporation, a professional engineering/construction management firm, has been selected by the Maryland Department of Transportation, State Highway Administration (SHA) to perform highway construction CPM schedule and contract claims review and analysis for the SHA's District 7. District 7 includes the counties of Howard, Carroll, and Frederick. Alpha Corporation's scope of work will include documentation review; initial and progress CPM and Activities Chart project schedule analysis; issue analysis; delay/impact analysis; participation in meetings; technical assistance in the preparation of the "Rule 4" file and in the answering of technical interrogatories; and participation in discovery procedure and assistance in the planning of strategies and case preparation for counsel, reports preparation, expert testimony, and litigation support. This is contract has a performance period of six years.

Alpha Corporation, a full-service woman-owned firm, provides civil/structural engineering, program/ construction management, project controls, and technology services for various building types and heavy infrastructure projects. Assignments have encompassed providing these services for a broad spectrum of clients, including all levels of government agencies, public and private enterprises/partnerships, Fortune 500/Global 1000 companies, institutions of learning, commercial developers, energy companies, contractors, architects, and more. Overall, the firm's project portfolio exceeds \$50B in program constructed value for the past 35 years. Alpha Corporation's vision is to be recognized by clients for responsive, innovative and quality services in the building and infrastructure sectors, and to be the employer of choice for professionals seeking stimulating and rewarding careers. Alpha Corporation's mission is to provide innovative and sustainable solutions for the lifecycle of building and infrastructure projects through the integration of best-practice engineering, program/construction management, project controls, and technology.
