## ALPHA CORPORATION ON WINNING TEAM FOR NIST CONTRACT

**DULLES, VA, September 11, 2014:** Alpha Corporation, a professional engineering/construction management firm, has received official word that the Summer Consultants team was awarded a contract to provide mechanical and electrical A&E Services under an indefinite delivery/indefinite quantity (IDIQ) contract for a variety of projects located on the National Institute of Standards and Technology (NIST) campus in Gaithersburg, Maryland. The NIST campus is a research and development (R&D) facility with 52 buildings located on a 232-hectare site. Projects under this contract may include but are not limited to evaluation, renovation, modification, replacement, and upgrading of centralized utility plants, medium-voltage electrical distribution systems, laboratories, and research facilities. Alpha Corporation's role on Summer Consultants' team will be to provide include civil engineering services. The contract performance period is for one base year with four additional one-year options.

Alpha Corporation, a full-service woman-owned firm, provides civil/structural engineering, program/ construction management, project controls, and technology services for various building types and heavy infrastructure projects. Assignments have encompassed providing these services for a broad spectrum of clients, including all levels of government agencies, public and private enterprises/partnerships, Fortune 500/Global 1000 companies, institutions of learning, commercial developers, energy companies, contractors, architects, and more. Overall, the firm's project portfolio exceeds \$50B in program constructed value for the past 35 years. Alpha Corporation's vision is to be recognized by clients for responsive, innovative and quality services in the building and infrastructure sectors, and to be the employer of choice for professionals seeking stimulating and rewarding careers. Alpha Corporation's mission is to provide innovative and sustainable solutions for the lifecycle of building and infrastructure projects through the integration of best-practice engineering, program/construction management, project controls, and technology.
